

A compiled list of **FREE** COVID testing sites in Southeast Seattle
Thank you for helping to keep our schools and communities safe!

NOTE: FREE diagnostic testing (if your child is exhibiting symptoms or has had a potential COVID exposure) is available at *some* Seattle Public Schools. You can contact your school admin to find out more.

All sites below can test you for diagnostic (if you have symptoms or have been exposed to COVID) or for precaution (if you want to do regular screening testing to protect your close contacts).

Regular screening testing of our children supports and protects our families & community public health. This is a free service that public health encourages us all to use as an important safety strategy!

****You can walk up day-of or make an appointment ahead of time.*

****You may be asked for your health insurance information, **but if you do not have health insurance, the test is still FREE.***
